

User Login (Employee & Manager)

Context:

- **A registered user (Employee or Manager) wants to log in.**

Primary Flow:

- 1. User navigates to the login page.**
- 2. System displays Username and Password fields.**
- 3. User enters valid credentials.**
- 4. User clicks "Login".**
- 5. System validates credentials.**
- 6. If valid, user is redirected to the dashboard.**

Alternative Flows:

- **Incorrect credentials entered:**
 - **A1. System displays "Invalid username or password."**
 - **A2. User re-enters correct credentials.**
- **Forgot Password:**
 - **A1. User clicks "Forgot Password".**
 - **A2. System asks for a registered email.**
 - **A3. System sends a password reset link.**
 - **A4. User resets password.**
 - **A5. User returns to login.**
