

Delete User (Admin Only)

Context:

- The Admin wants to permanently remove a user from the system.

Primary Flow:

1. Admin navigates to User Management.
2. Admin selects a user and clicks "Delete".
3. System asks for confirmation.
4. Admin confirms the deletion.
5. System removes the user from the database.

Alternative Flows:

- Admin tries to delete a user assigned to active tasks or projects:
 - A1. System prevents deletion and informs the admin.
 - A2. Admin must reassign or remove the user from tasks/projects before deletion.
- Admin tries to delete themselves (Super Administrator account):
 - A1. System prevents deletion of the last remaining admin.
