

## **Filter Groups by Group Lead**

### **Context:**

- **An Admin or Manager wants to filter groups based on their assigned lead.**

### **Primary Flow:**

- 1. Admin/Manager navigates to Group Management.**
- 2. Enters a Group Lead's name in the filter field.**
- 3. Clicks "Filter".**
- 4. System filters the groups based on the selected lead.**

### **Alternative Flows:**

- **No groups match the selected lead:**
  - **A1. System displays "No groups found for the selected Group Lead."**
- **Admin clears the filter:**
  - **A1. System resets the group list to show all groups.**
