

Search Projects

Context:

- **A Manager wants to search for projects by name.**

Primary Flow:

- 1. Manager navigates to Project Management.**
- 2. Enters a project name in the search box.**
- 3. Clicks "Search".**
- 4. System filters projects based on the input and updates the displayed list.**

Alternative Flows:

- **No projects match the search criteria:**
 - **A1. System displays "No projects found matching your search criteria."**
- **Manager clears the search field and clicks "Search":**
 - **A1. System resets the project list to show all projects.**
