

Edit an Existing Group

Context:

- **Admin or Manager modifies group details.**

Primary Flow:

1. **Admin/Manager selects a group.**
2. **Clicks "Edit".**
3. **Makes changes (e.g., adding/removing users).**
4. **Clicks "Save".**
5. **System updates the group.**

Alternative Flows:

- **Manager tries to edit a group they don't own:**
 - **A1. System denies access unless Manager has permissions.**
