

## **Filter Users by Role**

### **Context:**

- **An Admin wants to filter users based on their roles (Manager/Employee).**

### **Primary Flow:**

- 1. Admin navigates to User Management.**
- 2. Admin selects a role from the filter dropdown.**
- 3. Admin clicks "Filter".**
- 4. System displays only users with the selected role.**

### **Alternative Flows:**

- **No users match the selected role:**
  - **A1. System displays "No users found matching the selected role."**
- **Admin clears the filter:**
  - **A1. System resets the user list to show all users.**
