

Edit Project Board Structure (Admin / Project Lead / Group Manager)

Context:

- Users with permission (Admin, Project Lead, or Manager assigned to a group in the project) want to modify the board layout.

Primary Flow – Add Column:

1. Authorized user navigates to the project board.
2. Clicks the “Add Column” icon.
3. Enters column name.
4. Clicks “Create/Add”.
5. System adds the new column to the board.

Primary Flow – Rename Column:

1. Authorized user clicks on a column header.
2. Selects “Rename”.
3. Edits column name and confirms.
4. System updates the column title.

Primary Flow – Reorder Columns:

1. Authorized user moves columns left or right to reorder them.
2. System updates the column positions.

Primary Flow – Delete Column:

1. Authorized user clicks “Delete” on a column.
2. System asks for confirmation.
3. User confirms.
4. System removes the column and any tasks within it (or asks for reassignment).

Alternative Flows:

- **User tries to add/edit/delete columns without permission:**
 - A1. System blocks the action and displays a “Permission Denied” message.

- **Column name is empty or duplicate:**
 - A1. System prevents submission and shows validation errors.
