

## **Search Groups**

### **Context:**

- **An Admin or Manager wants to search for groups by name.**

### **Primary Flow:**

- 1. Admin/Manager navigates to Group Management.**
- 2. Enters a group name in the search box.**
- 3. Clicks "Search".**
- 4. System filters groups based on the input and updates the displayed list.**

### **Alternative Flows:**

- **No groups match the search criteria:**
  - **A1. System displays "No groups found matching your search criteria."**
- **Admin clears the search field and clicks "Search":**
  - **A1. System resets the group list to show all groups.**
