

## **Edit User (Admin Only)**

### **Context:**

- The Admin modifies user details such as role, email, or password reset.

### **Primary Flow:**

1. Admin navigates to User Management.
2. Admin selects a user and clicks "Edit".
3. System loads the user's details.
4. Admin makes changes such as:
  - Changing role (Manager / Employee)
  - Updating email
  - Resetting password
5. Admin clicks "Save Changes".
6. System updates the user's record.

### **Alternative Flows:**

- Admin tries to modify a user that doesn't exist:
  - A1. System informs the admin that the user does not exist.
- Admin changes email to an already existing one:
  - A1. System prevents submission and displays an error.
- Admin resets the password:
  - A1. System generates a temporary password and emails it to the user.
