Search Users

Context:

- An Admin wants to search for users by name.

Primary Flow:

1. Admin navigates to User Management.

2. Admin enters a search term in the search box.

3. Admin clicks "Search".

4. System filters users based on the input and updates the displayed list.

Alternative Flows:

- **No users match the search criteria:**

  - A1. System displays "No users found matching your search criteria."

- **Admin clears the search field and clicks "Search":**

  - A1. System resets the user list to show all users.
