Edit Ticket

Actor: Assignee / Project Manager / Admin
Description: A user edits an existing ticket.

Primary Flow:

1. **User clicks "Edit" on a ticket from the board.**

2. **System displays the current details of the ticket:**

   o **Title**

   o **Description**

   o **Assignee**

   o **Stage**

3. **User makes changes and submits the form.**

4. **System compares changes to original values and logs updates in history:**

   o **Example:**

     ▪ **"Jane Doe updated the Title to 'Fix Login UI Bug' at 4/14/2025 12:15 PM"**

     ▪ **"Jane Doe updated the Assignee to 'Freddie Freeman' at 4/14/2025 12:16 PM"**

5. **System updates ticket in the database and returns to the board.**

Alternative Flow – Failure:

- **If the ticket edition was canceled or an exception occurs:**

   o **System shows an error message: "Sorry, editing ticket failed."**

   o **User remains on the board view.**
