Create Ticket

Actor: Project Manager / Group Manager / Admin
Description: A user with permission creates a new ticket in the system.

Primary Flow:

1. User navigates to the board and selects a stage (e.g., "To Do").

2. User clicks "Add Item".

3. System displays a form requesting:

   o Title

   o Description

   o Assignee

   o Selected Stage (auto-selected based on board view)

4. User submits the form.

5. System stores the ticket and:

   o Initializes the ticket history with a creation log entry:

      ▪ Example: "John Smith created 'Fix Login Bug' at 4/14/2025 11:44 AM. Initial Assignee: Jane Doe. Initial Stage: To Do."

6. System redirects back to the board view.
